ACTION USUALLY PRECEDES CALL

(International News Service) HARRISBURG, Aug. 15. --Hastily-drafted financial and

administrative reports of state governmental departments piled up on Gov. Gifford Pinchot's desk today as Capitol hill speculation over a special session of the legislature mounted to fever

heat. Clerks and office workers at the Capitol burned the midnight oil last night getting the department reports ready for the governor after a call had gone out to have them in the executive offices within 24 hours.

the executive offices within 24 hours. Precedes Call In the past, it was said, similar

calls for departmental reports have preceded the calling of a special ses-

sion of the legislature.

Although there was no authoritative word, it was expected the governor intends to summarize the reports and take them with him to Washington when he makes what is believed to be a final appeal to federal officials to mitigate their ultimatum that the state must begin to furnish half the relief load beginning September 1.

Governor Plans Trip To Capital

Being Rushed By State

Employes At Harrisburg

ACTION USUALLY PRECEDES CALL

(International News Service) HARRISBURG, Aug. 15. -Hastily-drafted financial and administrative reports of state governmental departments piled up on Gov. Gifford Pinchot's desk today as Capitol hill speculation over a special session of the legislature mounted to fever

Clerks and office workers at the Capitol burned the midnight oil last night getting the department reports ready for the governor after a call had gone out to have them in the executive offices within 24 hours.

Precedes Call In the past, it was said, similar calls for departmental reports have preceded the calling of a special ses-

sion of the legislature. Although there was no authoritative word, it was expected the governor intends to summarize the reports and take them with him to Washington when he makes what is believed to be a final appeal to federal officials to mitigate their ultimatum that the state must begin to furnish half the relief load be-

ginning September 1. The executive has said that forced to call a special session, which open" to include many subjects

other than relief. Governor Pinchot has scheduled lon. a trip to Washington for later this week. He returns to the aCpitol today from Milford and this afternoon will dedicate a marker at the site where three years ago today he turned the first spadeful of earth for the so-called Pinchot road system.

Postpones Trip.

Harrisburg, Aug. 15.-Gov. Gifford Pinchot today announced that he had postponed until next week plans for a trip to Washington to make a final appeal to avoid a special session of the legislature for relief.

The postponement was decided upon when it was learned that Harry L. Hopkins, federal relief administrator, will not return to the national capitol until next Wednesday.

Correspondent WASHINGTON, Aug. 15 .- Silver began to flow into the mints and assay offices of the United States at a rapid rate today.

Silver on hand in the treasury June 14 which had been purchased under the execute order of Dec. 21, 1933, has bene made the basis for the issuance of silver certificates at the rate of \$1.29 an ounce.

Under that order about \$80,000,000 in certificates will be issued. Approximately \$12,000,000 of these certificates have been prepared by the bureau of engraving and printing. The rest of the \$80,000,000 will be rushed out as rapidly as the presses can print them.

This silver had been purchased at an average of 75 cents an ounce, both in foreign and domestic markets. The newly mined silver was purchased at 641/2 cents an ounce. Profit To Nation.

The seignoirage or profit on that silver has amounted so far to about \$10,000,000 and is carried as general receipts of the treasury. Seignoirage does not accrue until silver certificates are issued against silver in excess of the purchase cost. The limitation of certificates is \$1.29 per ounce in silver.

Two men went to death with her. The law makes no distinction for sex, Governor Herbert H. Lehman said. True—and perhaps wisely. Thus the public eye is turned upon the whole problem of capital pun-ishment.

Lewis E. Lawes, warden of Sing Sing prison, who gave the signal that put Mrs. Antonio to death, said immediately afterwards:

"With the death of Mrs. Antonio in the electric chair, I am more than ever opposed to these legal killings. While I am convinced that the chair is the most humane method of execution it is after all only a legal killing. I can reach but one conclusion every time I carry out a death sentence. From every point of view the death pen-alty is futile. Some day, perhaps, civilization will find some other way of compensating society. The death penalty has been tried, judged and found wanting."

CAT AND MOUSE

The horror of the present system the cat and mouse method with which the state plays with the condemned for months in the death house—is even more subtle in its undermining influence than the painful physical tortures of old.

CRIMINAL PROBLEM

The average American takes up his paper and demands action on the criminal problem, then ambles blithely away. Criminologists shake their heads

over this, The problem is one that takes depth of understanding, a broad view, a distinct tolerance.

Crime is bred. It is bred in a hundred places—in tenements, in city life, in prisons, even in schools.

It is bred in such places because the body civic—the people them-selves—will not lend themselves to the task of evolving a new world for this particular world. It will not exchange an outworn age for a new

Since then there has arrived the airplane which, leaving the base of supplies, is capable of flying over great distances. The dog-sled is a side show.

With definite information concerning the North Pole and the elimination of the Northwest Passage, which was never more than a theory, there is a question whether there is any call for further adventures into that region, whether anything more of importance is to be learned there. And so with the South Pole. It has been flown over. The immense surrounding territory has been fairly well mapped out. There are mountains buried under ice—and apparently nothing else.

Since then there has arrived the airplane which, leaving the base of supplies, is capable of flying over great distances. The dog-sled is a side show.

With definite information concerning the North Pole and the elimination of the Northwest Passage, which was never more than a theory, there is a question whether there is any call for further adventures into that region, whether anything more of importance is to be learned there. And so with the South Pole. It has been flown over. The immense surrounding territory has been fairly well mapped out. There are mountains buried under ice-and apparently nothing else.

LATEST U. S. PROBLEM

Dry weather and the effects of drought on relief and purchasing power, are now one of the nation's biggest problems.

A wholly unexpected burden of relief faces the government, that of feeding the drought-stricken farmers. To get the mney Uncle Sam can take one of several methods, but any of them, will act in some degree like sand in the machinery of recovery.

The Almighty may not have reproved Secretary Wallace for limiting crops, but natural law seems to be working out the way Theodore of Porcuincula." Roosevelt and Gifford Pinchot declared 30 years ago it would if the forests were not conserved and extended. Dry weather, dust blizzards, and water famines do not reach extremes where forests aid in regulating water.

Some weeks ago General Johnson declared that prices must be kept to San Francisco. down. The consumer fervently agreed with him. Now nature has entered into a conspiracy with price-raisers to boost the cost of necessities.

Secretary Wallace now says that crop control must go on, and surpluses be kept to a minimum. More people than the Republicans had hoped the secretary would admit his error of too much "relief," If the lack of forests is dooming us to drouths and sand blizzards as annual events then Wallace is very much on the wrong track.

DAY DREAM

I wish I could play the violin. Not just in an amateurish way. Not even professionally, either. I wish I could play it better than Kreisler, Heifetz or Menuhin. (As long as a fellow is day-dreaming something he'd like to have or be, he might as well wish for every-thing.) I wish I could play it naturally, simply, as any bird sings, as convincingly as any meadowlark on a fence post, like an angel out of heaven, like a devil out of hell, like a demi-god from some other world. I wish I could play it right now. Wish I could pick up a Stradivarius and with "majestic instancy" place it beneath my chin and my fingers upon its throat and make grand music that would bring tears to the soul and merry laughter to the human heart... Never mind the interminable practicing. The long hours of fingering and faltering, melanchely disharmonias the strugmelancholy disharmonies, the strug-gling and failing, the agonies and ecstasies and despairs....No, I want to know how to play the violin right

Woman's Execution May Bring Change Warden Declares Against Death Penalty State Adds To Horrors With Uncertainty

By LESLIE EICHEL

Central Press Staff Writer NEW YORK, Aug. 15—The execuion of a woman may bring a great ocial change.

A wave of horror has swept over trocution of Mrs. Anna Antonio, 28, mother of three children. Two men went to death with her.

The law makes no distinction for sex. Governor Herbert H. Lehman said. True and perhaps wisely Thus the public eye is turned upon the whole problem of capital pun-

Lewis E. Lawes, warden of Sing Sing prison, who gave the signal that put Mrs. Antonio to death, said immediately afterwards:

"With the death of Mrs. Antonio the electric chair, I am more than ever opposed to these legal killings. While I am convinced that killings. While I am convinced that the chair is the most humane method of execution it is after all only a legal killing. I can reach but one conclusion every time I carry out a death sentence. From every point of view the death penalty is futile. Some day, perhaps, civilization will find some other way of compensating society. The death penalty has been tried, judged and found wanting."

CAT AND MOUSE

The horror of the present system—the cat and mouse method with which the state plays with the condemned for months in the death house—is even more subtle in its undermining influence than the painful physical tortures of old.

Mrs. Antonio awaited death for 15 months. Her parallels.

What, then, is the outcome? Are their fewer murderers?

No. Murder becomes a glorification, a murderer becomes a martyr. Murder increases. Once it was the

custom to fight fire with fire, to create destruction to stop destruction. In actual effect, there is merely more destruction in the end. CRIMINAL PROBLEM

The average American takes up his paper and demands action on the criminal problem, then ambles

blithely away.

Criminologists shake their heads over this.

The problem is one that takes depth of understanding, a broad view, a distinct tolerance.

Crime is bred. It is bred in a hundred please is

Crime is fired. It is bred in a hundred places—in tenements, in city life in prisons, even in schools. It is bred in such places because the body civic—the people themselves will not lend themselves to the fack of suching a new world. the task of evolving a new world for this particular world. It will not exchange an outworn age for a new age. Why?

It is easier to say, "Stop crime put the criminal away!"

PRISONS Some day—say criminologists— we shall look back on our penal sys-tem with shudders and embarrass-ment.

Prisons and prison camps, electric chairs and gallows, chain gangs and sweat boxes, the utter futility of crushing the spirit out of a man, the absurdity of recreating a man to take his place in his society by such measures, some day will be seen in their true perspective. Rev. Crooks reports a large attendance, some 1100 persons, 900 of whom were registered delegates. The meetings were enthusiastic, and the church representatives returned to their various homes imbued with a new spirit for carrying out many new activities outlined.

Three different organizations were represented at the meeting, the synod, women's synodical, and the young peoples branch. The latter department has been accustomed to holding a meeting once every four year period, and this year, being the fourth year, they combined with the larger organizations.

Among other representatives from the Reformed church in this district were Kenneth Kennedy, elder in the local church, who attended the synod; Mrs. S. L. Wilson, Mrs. E. B. Kennedy, Mrs. R. H. Pattison, who were at synodical; Oscar Riley, sister, Dorothy Riley, Harold Gross-man, Darlo Shaw and Peggy Patti-son, who attended the young peoples

THE CODE SIGNERS AND THE CONSTITUTION

Editor News:-

August 9, it was stated that John-son now admitted that the newspa-power that they had as owners of pers were right in refusing to sign the code, until a clause was inserted reserving to them all their Constitutional rights. This brings up some interesting history.

It was discussed at length between Johnson and the attorneys for the code signers. He assured them again and again that by no possibility could the signing of

he code be a waiver of the constitutional right under the above section. After months of discussion and upon the assurance by Johnson that no such construction could be placed upon the codes they were generally signed. The newspaper publishers, however, refused to sign until a clause was inserted reserving to them the rights guaranteed by the Constitution. In this Johnson now admits they were right. In the suit filed against the Wier-

ton Steel company, the position taken by the steel company was, that the enforcement of the codes would be the taking of private property not for public use and without compensation. The attorney general im-mediately answered that the steel company had signed the code and had, therefore, waived all their constitutional rights in the ownership of private property. If this position is sustained by the supreme court, every signer of the code has absolutely waived all rights as guaran-teed under the Constitution, that is, any property that he may own may be taken by the government at any time without any compensation and not for public use.

This arises from the fact that if the government has the power to fix prices at which the owner may sell his property, it of necessity includes the power to take the property at any price which the government

ers by the government was the in- els.

Roundhead Regiment Has Fine War Record

In all the history of the Union forces in the Civil War none had a more glorious history than the 100th Roundhead Regiment. The 69th annual reunion of which is being held today in the Central Presbyter-ian church, formerly White Hall. In almost from the start, the regiment fought 26 engagements, emerging from the war with a record written in letters of fire and gold.

The regiment was organized in August 1861, the enlistments being for a three year period. In January 1864 the regiment re-enlisted and served until the men were mustered out on July 24, 1865.

Looking over the battle record of the famous old regiment is like reading the high spots of the Civil War. Bull, Run, Antietam. Spottsylvania, the Wilderness, Cold Harbor, Vicksburg, and the assault on Petersburg, all of them key battles and in all of them the Roundheads were in the thick of the battle. The casualties were heavy but the regiment went on, filling the gaps with new recruits, upholding the Looking over the battle record of

with new recruits, upholding the tradition of the regiment, unwaveringly going forward that the Union might be upheld. The history of the regiment will be a glorious page in the military history of the United States as long as time shall last. The deeds of those youngsters went out of Lawrence county with the Roundheads will serve for ever as an inspiration to their descendants and to the people of the

county.

The first battle in which the regiment was engaged was that at Port Royal, S. C., on November 7, 1861. On January 1, 1862, they were enat Port Royal Ferry, S. C. Reunion Event

Roundhead Veterans And Families Have Gathered Nearly 70 Years

Reunions of military units are ot an uncommon thing. Civil Wor hold them each year, but not all of them have held reunions for as many years as has the 100th Roundhead regiment, and but few of them got organized as soon after the war

The reunion today in the Central Presbyterian church is the 69th annual affair of the kind. The first step towards organizing the regi-ment was taken on November 18, 1866, in Good Templars hall, Pittsburgh, when the Roundhead Regimental Association was formed. The next meeting was in New Castle, on September 17, 1867, and reunions have been held every year since.

For a number of years the reun-lons saw hundreds of the veterans getting together. Time took its ravages and gradually the number became smaller due to deaths and age. As the years rolled on the descendants of the men of the famous regiment joined with the survivors and have taken an increasing interest in preserving the memories of the Roundheads.

The officers elected in 1933 were all descendants of the regiment men, with the exception of the pres-ident, James P. Sankey, of Crafton,

Diary Kept By Roundhead Is **Being Preserved**

When the Roundheads left Law-rence County in '61, some of the boys in the various outlits kept diarles. At least one of the diarles, that of Major James H. In the early hours of this morning my father ended the long, long march—halted, and lay down for sweet rest and peace. I shall not say very much now, for we are shak-en by our loss, but lying mutely on his desk was the card you had sent to him to fill out for the annual reunion of his beloved regiment, the Roundheads. I am sending it unnarked, like silence. No, he will not be there!

But perhaps he will be, too? How strangely it happens that on August 16th, the day of your 68th reunion, he is to be laid away in the cemetery at Valley Forge beside my mother who left us on May Day of their comrades over the river. Part Of Service At Roundhead Reunion Being Held Here Today

Hatchers Run, Va., October 27, One of the ritualistic rites at the annual Roundhead reunion, which is being held today in the Central Presbyterian church is the reading Final Assault on Petersburg, Va., of the memorial to the regiment, prepared on September 12, 1894. The memorial was originally prepared by Chaplain Robert Audley Browne and each year as the reunion is held, the memorial is read again.

It is a beautiful thing, short and expressive and well worth repeating here. It follows: "To these comrades we do not to-

With Silver Dust, 20-minute soaking* is enough

Ladies, this is startling news! Science has just discovered. that if clothes are soaked for long periods, even in pure, plain water, that fabrics soon weaken and clothes wear out.

Therefore, you should use a soap that washes gently, yet so quickly that clothes do not need to be soaked longer than twenty minutes.

In Silver Dust, you have just such a soap. It does the work quickly and thoroughly, yet so gently that it is always kind to your daintiest fabrics and your hands. And Silver Dust actually makes colors brighter than new. Anything that is washable, you can safely trust to Silver Dust.

* So recent are these discoveries about soaking that we have not yet had the opportunity to change the directions on our package which suggest over-night soaking. However, our tests have proved that with Silver Dust, 20-minute soaking is enough.

Why are Old Golds so throat-easy. yet so delightful to the taste?"

asks Margaret Sullavan

[RECENT OLD GOLD CONVERT]

Dear Miss Sullavan:-

To be easy on the throat, a cigarette must be made of mild, slow-burning tobaccos. But some people make the mistake of confusing mildness with flatness.

As a matter of fact, the smoothest and mildest tobaccos are also the best tasting-the most enjoyable to smoke. The same sun-ripening and aging that help to develop smoothness impart flavor and character, too.

So it's not strange, after all, that Old Golds possess both taste appeal and throat-ease to such a marked degree. For in the choicest tobaccos these two virtues just naturally go hand in hand.

With Silver Dust, 20-minute soaking* is enough

Ladies, this is startling news! Science has just discovered that if clothes are soaked for long periods, even in pure, plain water, that fabrics soon weaken and clothes wear out.

Therefore, you should use a soap that washes gently, yet so quickly that clothes do not need to be soaked longer than twenty minutes.

In Silver Dust, you have just such a soap. It does the work quickly and thoroughly, yet so gently that it is always kind to your daintiest fabrics and your hands. And Silver Dust actually makes colors brighter than new. Anything that is washable, you can safely trust to Silver Dust.

* So recent are these discoveries about soaking that we have not yet had the opportunity to change the directions on our package which suggest over-night soaking. However, our tests have proved that with Silver Dust, 20-minute soaking is enough.

QUICKER and EASIER washing this new way

WHEN PROPER utes. Clothes wash quicker. Fabrics last longer. Colors

With Silver Dust, 20-minute soaking* is enough

Ladies, this is startling news! Science has just discovered that if clothes are soaked for long periods, even in pure, plain water, that fabrics soon weaken and clothes wear out.

Therefore, you should use a soap that washes gently, yet so quickly that clothes do not need to be soaked longer than twenty minutes.

In Silver Dust, you have just such a soap. It does the work quickly and thoroughly, yet so gently that it is always kind to your daintiest fabrics and your hands. And Silver Dust Four Silver Dust box tops sent to us actually makes colors brighter than new. Anything that is washable, you can safely trust to Silver Dust.

* So recent are these discoveries about soaking that we have not yet had the opportunity to change the directions on our package which suggest over-night soaking. However, our ests have proved that with Silver Dust, 20-minute soaking is enough.

Why are Old Golds so throat-easy. yet so delightful to the taste?"

asks Margaret Sullavan

[RECENT OLD GOLD CONVERT]

Dear Miss Sullavan: --

To be easy on the throat, a cigarette must be made of mild, slow-burning tobaccos. But some people make the mistake of confusing mildness with flatness.

As a matter of fact, the smoothest and mildest tobaccos are also the best tasting-the most enjoyable to smoke. The same sun-ripening and aging that help to develop smoothness impart flavor and character, too.

So it's not strange, after all, that Old Golds possess both taste appeal and throat-ease to such a marked degree. For in the choicest tobaccos these two virtues just naturally go hand in hand.

> Sincerely, P. LORILLARD COMPANY, INC. ESTABLISHED 1760

though it has just been completed. already has proven its worth.

During this spring and early sum mer the western part of the state suffered the most severe drought on record. Without the supply of water in the dam the industrial loss through lack of water would have been huge in the industrial towns

below the dam. Release Water.

But, although by May 1st the reservoir was filled to only 20 per cent of its total capacity, there was enough water to discharge more than two billion gallons through the gates of the dam to meet the needs for water for domestic, industrial and sanitary purposes in the valley. The first water was released on May 29th at the rate of 20 million gallons per day. On July 1st the amount was increesed to 35 million

Another Hapsburg. Faith And A Snake-Bite. Shame Is A Good Sign. By ARTHUR BRISBANE

in a private conference saw Dictator Mussolini, and gossips suggest that Mussolini will encourage Austria to Redford and those who have been restore a Hapsburg, the young Otto, restore a Hapsburg, the young Otto,

But why people as intelligent as group had a fine time at Hains-the Austrians should think of tak- worths in West Pittsburg and all are

NEVER ADOPT a plan unless you William Bryant, in the Louisiana Penitentiary, read about Dillinger "escaping from prison with the ald of a toy pistol, made of wood, ter-rorizing guards by the dozens, tak-

ing away their weapons.

A newspaper clipping about that pistol was found on Bryant's body, after he had been shot dead, trying the same "wooden pistol" method of escape.

Bryant and his fellow convict, William Chandler, whittled out two toy pistols, two, surely, would be better than one. They and eleven other convicts that followed them were all killed, wounded or caught. Mrs. Joe Davis has been on the lick list.

Were all kinet, woulded or taught. Seven shots from a repeating rifle finished Bryant, when he pointed his wooden pistol at a guard and ordered "hands up."

> DILLINGER'S FATHER, an old Quaker farmer, has been forbidden to "make a little money" by ap-pearing in public, in New York City to lecture on his son's life and death. Legitimate actors and thea-ters protested, although there seems little connection. He who would pay to see Dillinger's father would hardly pay to see "Hamlet," and the fa-ther might have earned his money usefully by warning youth that crime does not pay with or without a wooden pistol.

> THE REV. ALBERT TEESTER of North Carolina, thinking it his duty to prove the power of God in some practical way, picked up a rattlesnake, allowed it to bite him twice, assuring his congregation that God's power would protect him. He picked up the rattlesnake "in Jesus' name," thinking this might prevent the serpent biting. It did not, and he said, "Although I was bitten it does not destroy my faith in Jesus Christ. The best physician in the world, God, is attending to

> SURE ENOUGH the Rev. Teester got well, although he suffered pain. To the "twenty-two saints" of his little congregation the clergyman showed his hand, scarred by snake fangs, then turning his eyes upward,

"God, I want you to have every bit of glory out of this hand."

SUCH COMPLETE FAITH might well move a mountain, although no man can say how much glory the curing a case of snake-bite. A sim-

NEW YORK STATE, which makes a practice of commuting and re-prieving all sorts of masculine murderers for all sorts of masculine reasons, with a parole board that turns out many of the worst crim-inals, saying practically: "Go and kill some more," allowed a miserable woman, Mrs. Anna Antonio, to die in the electric chair, to the state's

It is some comfort, however, to know that the state is ashamed of tself, for to be ashamed is the first sign of improvement.

WITH THE WOMAN, killed by the state as she had killed her drugpeddler husband, three strong, broad matrons were sent into the death room. They stood almost touching each other, as close to the death chair as caution would permit shutting out from reporters and other witnesses the actual sight of

the woman's hideous death. If New York state is now ashamed of killing women perhaps it will go farther, and STOP killing women.

SIKORSKY, who made the biggest passenger plane now flying suc-cessfully, the S-42 Brazilian chipper, predicts "fifty-ton aircraft," three times as big as S-42.

The 50-ton heavier-than-air ship will come, pass and seem like a toy compared with real airships of the future. Columbus, in his tiny carsvel, might have predicted a sailing ship 100 feet long. He could not have dreamed of a ship 1,000 feet long, driven by steam.

THE FUTURE will see the 1,000foot long lighter-than-air ship, all metal, flying above clouds, storms and high winds, sailing around and around the earth, dropping smaller ships with passengers for various ports, New York, San Francisco, To-klo, etc.

And such ships, taking in "wire-less power" from waterfalls and other power plants along their route, will be burdened with no fuel load and come down to earth rarely, for major repairs.

In his weekly press statement, issued today, Governor Gifford Pinchot expresses his pleasure at the completion of the Pymatuning dam, which is to be dedicated on Friday.

Discussing the Pymatuning pro ject, the governor said:

On Friday, August 17, Pymatunnig dam will be dedicated. This dam, in my opinion, is one of the greatest single projects in the public interest built in Pennsylvania in many years.

It should be a matter of real satisfaction to every Pennsylvanian to realized. know that the Pymatuning dam, although it has just been completed, already has proven its worth.

During this spring and early summer the western part of the state suffered the most severe drought on record. Without the supply of water in the dam the industrial loss through lack of water would have been huge in the industrial towns below the dam.

NEW YORK STATE, which makes a practice of commuting and re-prieving all sorts of masculine mur-derers for all sorts of masculine reasons, with a parole board that turns out many of the worst criminals, saying practically: "Go and kill some more," allowed a miserable woman, Mrs. Anna Antonio, to die in the electric chair, to the state's

It is some comfort, however, to know that the state is ashamed of itself, for to be ashamed is the first sign of improvement.

WITH THE WOMAN, killed by the state as she had killed her drugpeddler husband, three strong, broad matrons were sent into the death room. They stood almost touching each other, as close to the death chair as caution would permit, shutting out from reporters and other witnesses the actual sight of the woman's hideous death.

If New York state is now ashamed of killing women perhaps it will go farther, and STOP killing women.

SIKORSKY, who made the biggest passenger plane now flying suc-cessfully, the S-42 Brazilian clipper, predicts "fifty-ton aircraft," three times as big as S-42.

The 50-ton heavier-than-air ship will come, pass and seem like a toy compared with real airships of the future. Columbus, in his tiny caravel, might have predicted a sailing ship 100 feet long. He could not have dreamed of a ship 1,000 feet long, driven by steam.

THE FUTURE will see the 1,000foot long lighter-than-air ship, all metal, flying above clouds, storms and high winds, sailing around and around the earth, dropping smaller ships with passengers for various ports, New York, San Francisco, To-

Unions Defeat Saks In First Game Of Series

Unions Score 4 To 3 Victory In Game At Centennial Field

AL RITCHIE IS WINNING PITCHER

Union Brewery softball team de-feated the Saks 4 to 3 last night at Centennial field in the first of a three-game series for the secondhalf title in the American softball league. The second game of the current series will be played at Cen-tennial field on Friday night at 6

The game was nip and tuck in every inning with some sensational fielding by both teams. Joe Fair pulled one of the most sensational Two Games In plays of the game in the late innings of the game by spearing a line drive in right-short that was ticketed for a double or triple. Manager John Fair had the Unions playing a fine brand of softball.

M. Polenick—was the batting star of the game with a slashing home run drive and a double. F. Clause was the heaviest batter in the Union lineup with three hits, one of them going for a triple. Ritchic Wins 25th.

Al Ritchie won his 25th game of found "Irv" Rubeis for nine hits. Ritchie fanned five men and Rubeis

had five strikeouts.
Ritchie worked himself out of a tough hole in the ninth inning after petting two men on base, he made the next the n

Unions Defeat Saks In First Game Of Series

Unions Ecore 4 To 3 Victory In Game At Centennial Field

AL RITCHIE IS WINNING PITCHER

Union Brewery softball team de-feated the Saks 4 to 3 last night at Centennial field in the first of a three-game series for the secondhalf title in the American softball league. The second game of the current series will be played at Cen-tennial field on Friday night at 6

The game was nip and tuck in every inning with some sensational fielding by both teams. Joe Fair pulled one of the most sensational plays of the game in the late innings of the game by spearing a line drive in right-short that was ticketed for a double or triple. Manager John Fair had the Unions playing a fine brand of softbail.

M. Polenick—was the batting star of the game with a slashing home run drive and a double. F. Clause was the heaviest batter in the Union lineup with three hits, one of them going for a triple.

Ritchic Wins 25th.

Al Ritchie won his 25th game of the season by holding the heavy hitting Eaks to six hits. The Unions found "Irv" Rubels for nine hits.

Ritchie fanned five men and Rubels had five strikeouts. Ritchie worked himself out of a tough hole in the ninth inning after getting two men on base, he made

City As Tigers Increase League Lead

PIRATES UPSET

By PAT BOBINSON

NEW YORK, Aug. 15.—Detroit's a great town, and Frank Navin's a genial host. Frank owns the ball club and will be glad to accept your reservations for the world's series.

Col. Jake Ruppert, owner of the Yanks, had some idea of playing host to the visiting firemen this October. But that was before Frank's battling Bengals twice knocked off Col. Jake's Yanks, 9 to 5 and 7 to 3.

It wasn't so much the fact that

PROFESSIONAL VS. COLLEGE FOOTBALL

The football game at Soldiers' Field in Chicago on August 31 will be more than just a game between the Chicago Bears and an all-star the Chicago Bears and an all-star more popular every year, it is likely team of college players. It is a that it will continue to improve in match between professional and coltine future. With the increasing size

similar nature have in further proof that the pro players are better than their college rivals. They have physical and psychological advange the property of the proof of the tages that are not open to the cam-pus athletes.

In the first place, the money

player is more mature than the col-lege student. He is usually around 24 to 30 years of age, a full grown man. The college player, on the other hand, is still a youth and, con-sequently, his body is not yet able to withstand the hard knocks of the game as well as his elder rival.

game as well as his elder rival.

Football in college is only one of many activities that make up a day's schedule. The student goes to classes most of the day and then spends only one or two hours before supper at the sport. However, the professional athlete devotes his full time to football. It is his business or career and he keeps posted on the game just as the merchant studies the sales problems which confront him every day. front him every day.

The chief argument the college

supporters use is that the pro players haven't the old college spirit They don't go out on the field with the intention of giving their all for the dear old university.

That is all very true, but when a man has a wife and a child or two to support. I'll wager he fights

a whole lot harder than he would for dear old "Wherezit." They are his alumni who spur him on to do

his alumni who spur him on to do his best to make good.

The pro player's job and the size of his salary depend upon the calibre of his playing. He has to work hard at all times in order that he will not be displaced and the possibility of a reward in the form of a wage increase, I imagine, would be just as great an incentive as the college spirit to produce high class college spirit to produce high class months back, was licked.

his spectacular playing immediately on entering the pro circuit. He has to learn more football before he can compete against the salary boys as

he did in college.

A comparison of the Pittsburgh
Pirates and Chicago Bears of last
season offers an example of what
experience means in pro football. The Pirates, a new team in the circuit, gathered together the all-Americans and other stars of the 1932 season from the colleges. The Bears, on the other hand, were composed of players who had already acquired experience in pro circles. The season ended with the Bears as champions and the Pirates near the

cellar. And with the pro game becoming ready aroused the old question of the game and thus keep pace with the superior brand of playing.

It is my opinion that this game tyill result, as previous ones of a college.

Stock Market Is Dull Today

Railroad Stocks Are Steady, But Show Some Signs Of Pressure

MINING SHARES IN FAIR DEMAND,

(International News Service) NEW YORK, Aug. 15.-Stocks dipped from 1 to 2 points in listless trading today as traders stepped to the sidelines pending the action of the American Telephone Com-pany directors who meet today on the company's dividend.

With the exception of the building shares, the list was inclined to be heavy and work lower.

The mining shares group was in fair supply at all times from the opening and U. S. Smelting lost about 2 points, while Howe Sound, American Smelting and Cerro De Pasco suffered slightly smaller

Railroad stocks were only steady but showed signs of pressure as the session progressed. The poor New York Central car loadings report was a factor in deterring the rails from any further recovery attempt

The commodity markets failed to provide any recovery stimulus to stocks. Wheat, and corn opened from fractions to more than a cent a bushel under yesterday's closing prices. Cotton was only barely

Consolidated Gas and other utility shares declined fractionally in the face of a comparatively favorably output report of the Edison

United Aircraft was a weak spot in the aviations losing nearly a point on the unfavorable earnings report. Chemicals, specialties, and liquors were generally dull.

Railroad Stocks Are Steady. But Show Some Signs Of Pressure

MINING SHARES IN FAIR DEMAND

(International News Service) NEW YORK, Aug. 15.-Stocks dipped from 1 to 2 points in listless trading today as traders stepped to the sidelines pending the action of the American Telephone Company directors who meet today on the company's dividend.

With the exception of the building shares, the list was inclined to be heavy and work lower.

The mining shares group was in fair supply at all times from the opening and U.S. Smelting lost about 2 points, while Howe Sound. American Smelting and Cerro De Pasco suffered slightly smaller

Railroad stocks were only steady but showed signs of pressure as the session progressed. The poor New York Central car loadings report was a factor in deterring the rails from any further recovery attempt.

The commodity markets failed to provide any recovery stimulus to stocks. Wheat, and corn opened from fractions to more than a cent a bushel under yesterday's closing prices. Cotton was only barely

FLEETWING Dewberry and his boss will be married 22 years come Sept. 9th. Maw wants to take a trip some place then for a couple of days and leave the 8 Dews and the two grand children at hone. It would be some trip, too, without dragging a bunch of kids. Frank will have to buy a present and the Missus told him today what she wanted and you couldn't guess in a thousand years what it is—a red table cloth. Bo you remember them, with the oil lamp in the middle of the table and the fire crackling in the grate? Boy, those were the good old days!

CHARGE PAIR DID NOT PAY FARE ON TRAIN FOR ERIE

Jack Murphy, of Maine, and John Acelin, of Pittsburgh were apparently all set to go to the Erie convention of the American Legion. Neither

is an ex-service man. From Pittsburgh to Erie they apparently decided to use the Pennsylvania Railroad passenger trains, without the formality of paying fare. One of the Pennsy officers grabbed them off and brought them before

Alderman James C. Brice. The squire seemed of the opinion that the two boys were "slickers" and to be certain they didn't get to Erie for the convention gave them a few days in jail to cool off. Murphy got 7 days and Acelin got four days. The convention will be over Saturday.

It takes two to make a street begger: One who prefers that way of getting a living, and one sap.

Railroad Stocks Are Steady, But Show Some Signs Of Pressure

MINING SHARES IN FAIR DEMAND

NEW YORK, Aug. 15 .- Stocks dipped from 1 to 2 points in listless trading today as traders stepped to the sidelines pending the action of the American Telephone Com-pany directors who meet today on the company's the company's dividend.

With the exception of the buildng shares, the list was inclined to be heavy and work lower.

The mining shares group was in fair supply at all times from the opening and U. S. Smelting lost about 2 points, while Howe Sound, American Smelting and Cerro De Pasco suffered slightly smaller Railroad stocks were only steady

but showed signs of pressure as the session progressed. The poor New York Central car loadings report was a factor in deterring the rails from any further recovery attempt. The commodity markets failed to provide any recovery stimulus to stocks. Wheat, and corn opened from fractions to more than a cent a bushel under yesterday's closing prices. Cotton was only barely steady.

Boy Coasting In Wagon Strikes Auto, Tuesday

Master Dunham Is Skinned And Bruised As He Sideswipes Car On Line Avenue

ELLWOOD CITY, Aug. 15,—Master Dunham of Smiley street received a few minor injuries about 2 o'clock last night when he was struck by an auto while coasting down a hill on the New Castle high-

way.
The accident occurred on the hill just off Line avenue after passing Runyan's Service Station. In his report at the local police station Wilson Brown of Cheswick, Pa., was traveling east on Line avenue and down the hill with wagons. One was on each side of the road. To avoid hitting the boy on his side of the road, which was Dunham, he swerved his car to the right off the road. ned. He could not turn left for fear of striking the other boy.

As he turned away the boy side-swiped the left side of his car. Young Dunham was fortunate in only acquiring a skinned knee and finger.

A note, written to her reported boy friend, read: "Goodbye Anglia, I'll always love

you. Anna.
"P. S.—I'm sorry we couldn't go on."

Her broken body was claimed later by her father, Fred Storoz. Two men who attempted to pre-vent the girl's death leap said she struggled from their grasp after she had scaled the rail of the bridge. "As she dropped, her dress caught

on the bridge and tore." said Joseph Donnellan, one of the pair who grabbed her arms as she clambered outside the bridge rail.
